PROFESSIONAL SUMMARY

Business Intelligence Analyst with 8+ years of experience transforming complex, multi-source datasets into executive-ready dashboards, reports, and actionable insights. Pursuing an M.S. in Applied Business Analytics from Boston University, with a strong technical foundation in Power BI, SQL, Python, and machine learning. Proven ability to translate data into clear business narratives that drive strategic decision-making across large, cross-functional organizations.

EDUCATION

Boston University

M.S. Applied Business Analytics. Completed June 2026 | Degree Conferral August 2026.

Aug 2026

University of Maryland Global Campus

B.S. Cybersecurity Management & Policy. Graduated with Honors.

2024

EXPERIENCE

Mid All-Source Analyst

Mar 2025 – Present

Amentum – United States Central Command (USCENTCOM)

Tampa, FL

- Analyze continuous, high-volume intelligence streams integrating SIGINT, HUMINT, MASINT, GEOINT, and OSINT to identify trends, risks, and emerging patterns across USCENTCOM operations.
- Develop executive reports and analytical briefings that translate complex multi-source data into clear, business-focused recommendations distributed across the intelligence community.
- Collaborate with cross-functional organizations to deliver integrated analytical assessments that improve situational awareness and support strategic planning.
- Present analytical findings to senior leadership to inform operational planning and executive decision-making.

Intelligence Specialist (Intelligence Analyst)

Nov 2017 – Nov 2024

United States Navy

Norfolk, VA

- Produced more than 1,000 analytical reports supporting executive decision-making.
- Led teams of up to 15 analysts during high-tempo operations.
- Analyzed complex datasets to identify trends, risks, and actionable insights.
- Developed reporting processes and standard operating procedures that improved organizational efficiency.
- Presented findings to senior leadership and cross-functional stakeholders.
- Managed security programs supporting over 40 personnel.

PROJECTS

Boston University Graduate Portfolio

- Built 15+ graduate projects spanning machine learning, business intelligence, forecasting, optimization, and risk analysis, including Power BI dashboards, Monte Carlo risk simulations, Bayesian statistical analysis, and time series forecasting models.
